# BULBS FOR FALL PLANTING

*The H. & O. Quality*

HYACINTHS—TULIPS—NARCISSUS  
HARDY PERENNIALS, PEONIES, PHLOX AND IRIS

BICOLOR EMPRESS

GOLDEN SPUR

HOLM & OLSON, INC.

ST. PAUL, MINN.

# THE PARK NURSERIES

Our Nurseries are located on one of the main avenues of the city, with easy access to all who live in St. Paul or Minneapolis, either driving or motoring, located on Lexington Boulevard and St. Clair Street, seven blocks south of Summit Avenue on Lexington Boulevard.

Those desiring to reach the nurseries by street car, take Grand Avenue line, get off at Lexington and walk six blocks south; or take Randolph-Hope car, get off at Lexington and walk north to Nurseries.

We extend to all our customers an invitation to visit Park Nurseries, see the different sizes and varieties of stock we grow, make your selection and have trees or shrubs marked. This should be done in the summer or fall months when they are in foliage, and at the proper season for planting they can be shipped or planted as you may desire. Many nurseries do not practice inviting their customers to select their stock, hence the necessity of buying the unseen.

## BEAUTIFYING YOUR GROUNDS

Our interest is yours—we design your grounds, tell you what is best suited and how it should be located for best results, and shall be pleased at any time to consult with you as to your needs.

## LANDSCAPE DEVELOPMENT

Our booklet on this subject treats on every phase of landscape art. It has been pronounced by the press as the most complete treatise issued in recent years on this subject. Its illustrations show what can be done, and its texts under the different headings are instructive and of most modern ideas.

## H & O QUALITY

We pride ourselves on the quality of our stock and the manner in which it is grown, so that each tree or shrub will be a specimen. Our method of growing is not to overcrowd, but to give each sufficient room to develop a root system as well as a well-proportioned top. To produce a good tree or shrub, it must be constantly watched from the time it is transplanted in the nursery row until it is permanently located in-decorating some lawn or park.

## IMPORTANT THINGS TO REMEMBER

**When Best to Order.** Order at once, so that the bulbs may be on hand to plant at the proper time.

**When We Ship.** Most fall bulbs are ready for shipment September 15; all orders are filled promptly,

**Prices.** Our prices are made on the best Holm & Olson quality of bulbs, and should not be confounded with cheap stock often sold through seed catalogues.

**Cash With Order.** Cash should always accompany orders. We cannot go to the expense of looking up responsibility of customers, or open accounts, unless arranged for in advance.

**How Bulbs Should Be Sent.** Unless when orders are large, they should be sent by mail or express, and we assure safe arrival. We prepay express and freight charges on bulb orders amounting to \$5—except collections.

**Be Careful.** Always use care in seeing that your order is carefully written, and name and address given in full. No matter how often you are writing us, this care should be used.

## COLLECTIONS FOR TULIP BEDS

The arrangement of the following beds will give very striking results. The beds are 6 feet in diameter and require 156 bulbs, planted 5 inches apart each way. These combinations can be changed, if desired.

### Bed A

1. 39 Artus	}	\$2.25
2. 39 La Reine		
3. 38 Chrysolora		
4. 39 Cottage Maid		

### Bed B

1. 54 Chrysolora	}	\$2.25
2. 48 Artus		
3. 54 La Reine		

### Bed C

1. 80 Chrysolora	}	\$2.25
2. 76 Artus		

These collections must be sent by express or freight, charges not prepaid.

LA GRANDESSE

GIGANTEA

QUEEN OF THE BLUES

## QUALITY HYACINTHS

**Culture Outdoors.** Any good garden soil that is well prepared by spading to a depth of 15 to 18 inches is suitable for Hyacinths. When the beds are used in the summer for geraniums or bedding plants, an application of well-rotted cow manure should be used and mixed

with the soil. Plant the bulbs 6 inches deep, and they should be planted very uniformly that they may come into bloom at the same time. A good method is to remove about 4 inches of the soil, level the bed carefully and plant the bulbs 6 inches apart each way, pressing the earth firmly and evenly over the bulbs.

**Culture in Glasses.** Special glasses are manufactured for the culture of Hyacinths, the bulb fitting in the top. These glasses should be filled with fresh water, also some gravel, and, if at hand, some charcoal.

**Culture in Pots.** Hyacinths are grown successfully by planting in pots. Use good, rich soil, with plenty of manure. Place some pieces of broken pots in the bottom for drainage, and use 4- or 5-inch pots. Firm the bulb well in the soil, allowing the top of it to stand just a little above the soil. If flowers are wanted for Christmas the bulbs should be planted in September.

### Extra Large Dutch Hyacinths

	Each	Dozen	100
Pure white.....	\$0.15	\$1.50	\$10.00
<b>Bloksberg.</b> Porcelain dble...	.20	2.00	15.00
<b>Cardinal Wiseman.</b> Fine dark pink.....	.20	2.00	15.00
<b>Chestnut Flower.</b> Light pink, extra.....	.20	2.00	15.00

Double

## SELECTED TULIPS

If but one display of early spring flowers can be afforded, choose the Tulip, for, after the long, dreary months of winter, what can furnish more cheer of color than a good selection of this—the handsomest of all spring-bulbs.

The season of the Tulip has been extended greatly in recent years. It is now possible to

THOS. MOORE

have them in bloom from the time the last snow disappears up to the middle of June.

The list of varieties in recent years have multiplied very rapidly and are most confusing to the average customer; hence, we have very carefully condensed our list so as not to confuse, and to give you the best, and also the advantage of recent improvements.

In order to still further assist the customer, we are giving the height of the flowers in figures, so the planting can be correctly arranged; also, the time of blooming, so you can have the beds harmonize, using varieties of the same height and that flower at the same time, allowing you to choose your color scheme.

**Culture.** The beds for Tulips should be treated the same as for hyacinths, except that the bulbs should be set close together, 5 inches instead of 6 inches, and covered by 4 inches.

**Culture in Pots.** Tulips are one of the most satisfactory bulbs to force. Place a half-dozen bulbs in a 6-inch pot and they will begin blooming between Christmas and Easter. They are treated otherwise, the same as the hyacinth.

### Single Tulips

<b>Madame Krelage.</b> 12-L. Soft ros'y pink, extra . . . . .	1.00	6.00	<b>Assorted Darwin Tulips.</b> . . . . .	.40	3.00

## SELECTED PARROT TULIPS

This family of Tulips is noted for their immense showy flowers with beautifully fringed or cut petals and varied colors, and so named because of its oddity. The flowers come in May, have long stems and are fine for cutting. In four different shades. 30 cents per dozen, \$2.00 per 100, \$18.00 per 1,000.

## LATE FLOWERING TULIPS

	Dozen	100		Dozen	100
<b>Bouton d'Or.</b> 12-L. Deep golden . . . . .	\$0.30	\$2.50	<b>La Candeur.</b> 14-L. Pure white . . . . .	\$0.50	\$3.50

AURATUM LILY

BICOLOR VICTORIA      SULPHUR PHOENIX

### SELECTED NARCISSI

(*The Spring Daffodil*)

The Narcissi are one of spring's earliest flowers, and there is no reason why we should not partake of the pleasures they bring with the first warm days of spring. The Narcissi grow in most any location, doing well in sunny or shady places, and it matters not

**PAPER WHITE**

**BARRII CONSPICUUS** if wet or dry. They continue to bloom year after year, increasing in size and effectiveness. They are valuable to place in the border of perennials, or shrubbery, where they can be left undisturbed, and for naturalizing in the grass. For forcing, treat the same as tulips, planting them in pots. The flowers assume many forms, and present charming combinations of white, gold, orange, sulphur and pure yellow.

#### Double Varieties

	Each	Dozen	100		Each	Dozen	100
<b>Albus plenus odorata.</b>				<b>Sulphur Phoenix.</b>	Sulphur white (butter and eggs)	\$0.08	\$0.75

						1.00
<b>Jonquil.</b>	Double yellow ..	.05	.50			
	Add 10 cents per dozen for postage.					

#### CHINESE SACRED LILY

**Water Fairy Flowers.** Flowers single; white with yellow center; freely produced; are successfully grown in water. Plant in shallow dish, using about one inch of gravel in the bottom, on this set the bulbs and fill with water. Cannot be used for outdoor planting.

	Each	Dozen
<b>Grand Monarque.</b>	White (New)	\$1.50
<b>Grand Soleil d'Or.</b>	Yellow (New) .....	.15
<b>Sacred Lily.</b>	White. Extra size bulbs.....	.15
	First size bulbs .....	.12
		1.00
	Add 15 cents per dozen for postage.	

DOUBLE VON-ZION

## SELECTED CROCUS

Can be planted in the grass or as a border for beds of perennials or around the edge of beds of other bulbs. When planted in sheltered locations they flower in March. They can be planted anywhere in the lawn,

and after blooming the tops can be cut with a lawn-mower without injuring the bulbs.

Our selection is the best; the extra large well-selected bulbs will produce large flowers of all shades of white, yellow and blue.

	Dozen	100	1,000
Blue. Extra large . . . .	\$0.25	\$2.00	\$16.00
Madame Mana. Striped. . . .	.25	2.00	16.00
Queen of the Whites. White . . . .	.25	2.00	16.00
Large Yellow . . . .	.15	.75	5.00

	Dozen	100	1,000
Mixed Blue . . . .	.05	.75	5.00
Mixed Striped . . . .	.15	.75	5.00
Mixed White . . . .	.15	.75	5.00

## SCILLA SIBIRICA

Early spring-flowering bulb; dwarf habit, from 6 to 8 inches in height, with drooping, bell-shaped blossoms of light blue. Very suitable for growing in pots. Bright, brilliant blue, 25 cents per dozen, postage paid. \$1.50 per 100; \$10.00 per 1,000.

## GIANT SNOWDROPS

The earliest of spring flowers, universally admired for their snow-white, drooping blossoms. The bulbs succeed well in any soil, and should be planted where they are to remain, as they bloom best when not disturbed.

**Elwesi.** 15 cents doz., post paid; \$1.00 per 100. **Nivallis.** Double. 15 cents per dozen, postage paid; \$1.00 per 100.

## ANOMONES (Poppy-flowered)

If planted in the fall they will bloom in early spring, producing brilliantly colored flowers. Should be grown in wet or moist places.

	Dozen	100
<b>Single.</b> Mixed colors . . . .	\$0.40	\$3.00
<b>Double.</b> Mixed colors . . . .	.40	3.00
<b>Double and Single.</b> Mixed . . . .	.35	2.50

## RANUNCULUS (Double Buttercup)

Among the smaller flowering spring plants these are, without doubt, the richest in coloring and most profuse blooming. Bulbs are tender and should be well mulched. 15 cents per dozen, \$1.00 per 100. Add 10 cents per dozen for postage.

## CROWN IMPERIALS

**Red, Yellow and Orange.** 20 cents each, \$2.00 per dozen.

OXALIS

These lovely flowers are among the most popular, and can be used in many ways. A few placed in pots or baskets will start off at once and soon be in flower, remaining so throughout the winter.

**Cernua Lutea** (Buttercup). Yellow. 30 cents per dozen, \$2.50 per 100.

## CHIONODOXA (Glory of the Snow)

A lovely flower producing spikes of beautiful azure-blue color, with pure white center. Forms a striking contrast. 30 cents per doz., \$2.00 per 100.

## FRITILLARIAS

The habit of growth is lily-like, and as a pot plant the effect is beautiful in the extreme; in fact, it is as beautiful as any lily. It is also hardy in the open ground, but does best indoors in pots or boxes. Requires the same treatment as Easter Lilies. 40 cents per doz., post paid; \$3.00 per 100.

## TRILLIUM GRANDIFLORUM

(Star of Bethlehem)

A hardy perennial of the lily family. Succeeds well in partially shaded locations; bloom increases in beauty each year. 10 cents each, \$1.00 per dozen. Add 10 cents per dozen for postage.

## FREESIAS

The beauty of the flowers and freedom of their bloom, their exquisite perfume, lasting qualities and the ease with which they can be forced, make this bulb of great importance.

	Dozen	100
<b>California-grown</b> . . . .	\$0.15	\$1.00
<b>French-grown</b> . . . .	.25	1.75
<b>Purity.</b> Almost pure white . . . .	.35	2.50

## PEONIES

**C**ONSIDER these features. The Peony is as hardy as an oak, absolutely free from disease of any description, entirely free from insects and pests of any sort. No dusting or spraying or picking of worms and no roots to take up each fall. Today, with its hundreds of improved varieties, the Peony rivals the rose in brilliant colorings, sweet fragrance and perfection of flower. The flowers are larger than those of any other perennial, and are borne on strong, stiff stems.

Our list comprises the cream of the newer and best old varieties.

**When to Plant.** Plant Peonies in September or October if you wish them to bloom the following June. The plants should be set with their eyes two or three inches below the surface of the ground. Place the clumps about three feet apart.

	WHITE	Each	Dozen
<b>Alba sulphurea</b>	.....	\$0.50	\$5.00
<b>Couronne d'Or</b>	.....	.75	7.50

## PHLOX

THE most satisfactory and useful of all herbaceous plants. Ample space should be set apart for them in every garden, and, with judicious selections, the season can be extended from June until ice forms. They succeed in almost any soil, or in any position. The plants remain in good condition for many years without attention, but respond rapidly to cultivation and care.

O RCHIDS of the hardy garden—so beautiful, graceful, rare, exquisite, delicate and varied are the forms, textures and coloring of the Hybrid Iris. Best of all, they are sweetly fragrant. No garden is complete without a good selection of these lovely flowers. So many places are found where they can be used, and they are always attractive and welcome, blooming in early summer, before most of the shrubs. A good border flower for planting along paths, for grouping in beds along foundations or lawn walks, near rustic work or in Japanese gardens.

## HARDY PERENNIALS

WE OFTEN refer to the planting of perennial gardens as the "old-fashioned gardens" of our grandmothers. This is not quite true, although our grandmothers used such well-known hardy plants as Dianthus, Columbines, Phlox, Campanulas, Sweet Williams, Delphiniums and Hollyhocks. But the perennials we have now are much superior, both in size and color. Many choice hybrids of Delphiniums, Phlox and others have been introduced, and our methods of planting are more attractive and inviting, with a greater care to blending colors and how best to please the eye.

## LAWN SEED

THE days of laboriously making lawns by sodding are rapidly passing away. The best lawns are now made from **good grass seed**. The essentials are a careful blending of varieties adapted to producing a thick turf with velvety appearance. Each variety in this composition has a special purpose. Some make strong, fibrous roots that take hold on the earth and hold it in position; others, of a creeping nature, quickly fill up the vacant spots; yet other sorts are used for their color value, and other kinds are able to withstand heavy or excessive rains. A lawn secured from pure seed is more satisfactory than one made by sodding; noxious weeds are apt to get a foothold in sod, but this is almost impossible when good seed is used.

**Quantity of Seed to Sow.** One pound will cover 200 square feet. To learn the quantity required, get the number of square feet and count one pound for every two hundred square feet. Write for our book, "The Essential Principles of Lawn Making;" it will tell you all about it.

**Velvet Sod Mixture.** Our Velvet Sod Mixture is composed of strictly pure seeds of hardy lawn grasses from America and Europe. It quickly produces a permanent, rich green color and luxuriant growth. If you need grass seed for a small city yard, or a large lawn, use this mixture; you will be sure of getting results. 1 lb. 30 cents, 5 lbs. \$1.50, 1 bushel (20 lbs.) \$5.00.

**Capital City Mixture.** This mixture is admirably adapted to all uses. The quality of seed is not so high as our Velvet Sod Mixture, but for ordinary sowing will answer the same purpose, and we know it is equal to any other mixture on the market. 1 lb. 25 cents, 5 lbs. \$1.25, 1 bushel (20 lbs.) \$4.00.

*Before and after—one year from planting.*

## RESULTS WITHOUT WAITING

Let us tell you how to get immediate benefits of right planting, where you will not have to wait years for results.

### Beautiful Homes

There is nothing which tends more to make home surroundings pleasant than a well-arranged planting of flowers, shrubs and trees.

### The H. & O. Way

We grow each tree, shrub and plant with the sole purpose of making it a strong, healthy, perfect specimen, and it has our guarantee to grow and give you satisfaction.

#### *Our Beautifully Illustrated Booklet "Landscape Development"*

will tell you more of "The H. & O. Method" of arranging and planning your grounds. It treats on every feature of landscape art, planting and what and when to plant.

We will be pleased to have you call or write us and consult with our Landscape Department on any planting or landscaping which you may have in view.
